L857
FELLER BUNCHER

HIGH PERFORMANCE ON STEEP SLOPES WITH INCREASED LEVELING CAPABILITY.

Tigercat®
Tough • Reliable • Productive

THE L857 COMBINES THE STABILITY OF A FULL TAIL SWING UPPER WITH A SLOPED TAIL FOR ENHANCED LEVELING CAPABILITY AND ADDITIONAL CHAIN CLEARANCE FOR WINCH ASSISTED OPERATION ON STEEP MOUNTAIN TERRAIN.

KEY BENEFITS

- Unique sloped tail for improved leveling capability and better winch assisted cable management
- Full shift comfort. Highly adjustable parallel action air ride seat with integrated heating and cooling
- Comfortable cab interior with clear sightlines. Ergonomic positioning of controls and display screens
- ER boom technology® improves fuel efficiency, reduces operator fatigue and increases productivity
- Extreme duty leveling undercarriage for excellent stability on steep slopes
- Power operated roof enclosure completely exposes the engine and major components while serving as a safe and convenient work platform

INCREASED BOOM ENVELOPE

- The L857 ER boom system provides tighter tuck, increased envelope and more below grade capability. Through-tip routing offers better protection of the hoses leading to the felling head. Three-mode ER provides the operator with a wide range of boom control options.

OPEN ACCESS

- The side opening engine roof completely exposes the top and both sides of the engine, and most hydraulic components. When open, the enclosure roof serves as a spacious side service platform to work comfortably and safely.

DESIGNED FOR STEEP SLOPES

- Optimized weight distribution and low centre of mass, along with Tigercat's patented super duty leveling undercarriage, provide excellent stability on steep slopes. The unique sloping tail design increases leveling capability to 26 degrees. Additional clearance improves cable management on winch assist applications, reducing chain rub and interference.

Tigercat®

L857 FELLER BUNCHER

POWER:	212 kW (284 hp)
CUT RADIUS:	8,79 m (28 ft 10 in)
TAIL SWING RADIUS:	3,08 m (10 ft 1 in)
