

A fully integrated factory fitted herbicide spray system to control coppice regrowth.

KEY BENEFITS

- Unique spray system located behind the saw blade provides an effective and even spray pattern
- Perfect volume of herbicide applied without interrupting productivity
- A delivery system designed to minimize spillage and wastage
- Operator can easily monitor and change spray volume and duration using touchscreen display in the cab
- A built-in water tank allows you to purge the system at the end of the day
- Components are easily accessible and well protected within the carrier

The spray system nozzle located behind the saw blade on the rear skirt housing provides an effective and even spray pattern.

Components are easily accessible and well protected within the carrier.

Herbicide and water tank are made of stainless steel to reduce the risk of corrosion.

COPPICE SPRAY SYSTEM

The Tigercat coppice spray system is available for both Tigercat wheel and track feller bunchers.
