

# 610H

## CABLE SKIDDER

COMPACT CABLE SKIDDER FOR SELECTIVE FELLING.

**Tigercat**<sup>®</sup>  
Tough • Reliable • Productive

WITH CLASS-LEADING OPERATOR VISIBILITY, SPEED, AGILITY AND POWER, THE 610H CABLE SKIDDER EXCELS IN TIGHT SPACES, SOFT SOIL CONDITIONS AND SELECTIVE LOGGING.

### KEY BENEFITS

- ▶ Electronic controlled hydrostatic drive, fuel efficient and easy to operate
- ▶ Maximum tractive effort always available, high breakout performance, minimized wheel spin
- ▶ Long-life centre section constructed with thick steel plate, large diameter pins and tapered roller bearings
- ▶ Hydrostatic winch, variable line speed based on load size for increased productivity
- ▶ Exceptional weight distribution for optimal performance in soft soil conditions and uphill skidding

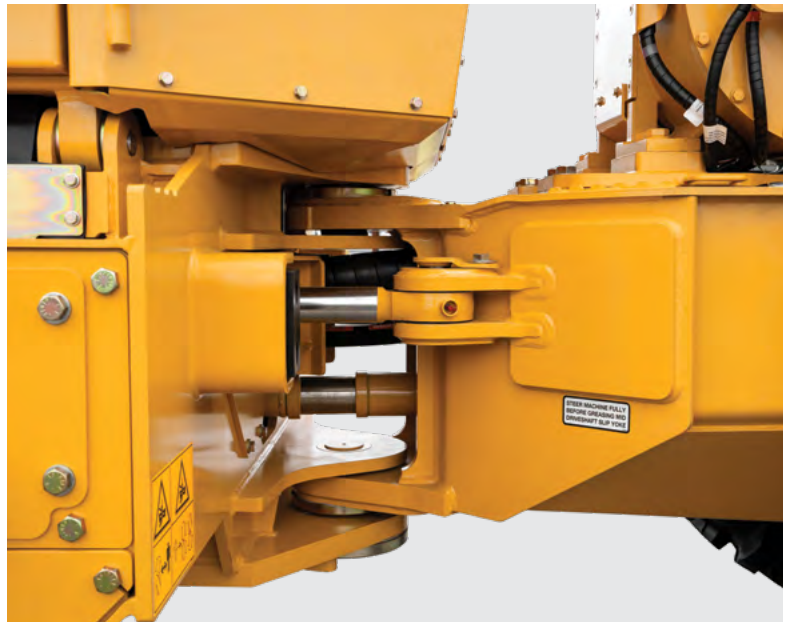

### EXCELLENT OPERATOR COMFORT

- ▶ The large, quiet cab features ergonomic control layout, climate control with numerous air vents and infinitely variable fan speed, and a hot and cold climate controlled cup holder. Dedicated storage locations have been added for a jacket, hard hat, and lunchbox. The 610H is fitted with a fixed position seat angled at 30 degrees.

## LONG-LIFE CENTRE SECTION

- ▶ Tigercat's legendary centre section design uses a preloaded tapered roller bearing system along with thick steel plate and large diameter pins. The result is a low maintenance steering joint that lasts the life of the machine.

## DURABLE TIGERCAT AXLES

- ▶ The 610H uses oversize axles for long life, reliability and high uptime. Tigercat axles are built in-house to match the high performance characteristics of Tigercat skidders. The rear axle is well protected by the winch shield.

## HIGH PERFORMANCE WINCH

- ▶ Hydrostatic winch with variable piston motor offers higher line speeds for lighter loads, while maintaining peak (bare drum) line pull for heavy loads. A wet-disk dynamic clutch allows the operator to drop a load and drive away or reel in a load while driving. A mechanical jaw clutch allows for low free spool resistance.
